

ROUNDTABLE AGENTS

IAAW Co LIVESTOCK DELIVERY WARRANTY

AGENT UPDATE

What's Happening

From 1 July 2026, RoundTable Agents will move from NTI transit insurance to the IAAW Co Livestock Delivery Warranty. This is a change in structure and provider, designed to be as seamless as possible.

Important: This Is Not Insurance

This is not an insurance policy. It is a delivery warranty built into the livestock transaction and operates under the IAAW Co Terms & Conditions.

This Is Already Used in the Industry

This approach is not new. Other agency groups in Australia already use similar delivery warranty models, including providers such as Elders. This is an established method of covering livestock in transit within the livestock industry.

What Does Not Change

Coverage intent remains the same (delivery during transport).

The day-to-day process for an agent remains the same.

Automatic inclusion (opt-out) remains the same.

Pricing structure to the client remains the same .

What changes

Back-end Admin process

Client payments on claims will be paid by the agency directly not via an insurance company

Invoices and account sales will now say livestock transit warranty instead of insurance

Warranty terms and conditions will be available on your company websites

Is Cover the Same

Yes. The warranty applies to delivery during the transport event and is governed by the Terms & Conditions.

ROUNDTABLE AGENTS IAAW Co LIVESTOCK DELIVERY WARRANTY AGENT UPDATE

Is the Price the Same

Yes, no change to the client, please be reminded there are different rates from 1-1500km and 1500km and over and your admin team needs to be able to separate these.

How Does This Affect Clients

Other than a change in wording there is minimal impact. Clients will deal with their agent as normal, there is no separate insurance policy, and claims handling is more direct.

What Questions to Expect

Is this still covered: Yes, it applies to delivery during transport.

Is this insurance: No, it is a delivery warranty.

Is this new: No, this model is already used across the industry.

Do I need to do anything differently: No, operate as normal.
