Wild weather has been predicted and this is Capital Plumbing's advice to all tenants and property owners.

They have predicted some heavy rain falls over the weekend and we hope everyone stays safe. Make sure all your tenants check their drains and gutters are clear from any debris that may inhibit water flow.

We have Tracey ready to answer your or your tenants call, at any time night or day if a property you manage has a problem with your drainage, plumbing or gas.

She will help you or your tenant through the problem and then promptly dispatch the nearest plumber to the property.

We have the latest drain clearing and location equipment to clear the toughest blockage.

For any roof leaks that are causing damage the property it is best to call the **S.E.S on 132 500** as they can safely get onto the roof and put tarps in place.

We can get there once the rain stops to do the required repairs.

I hope you or your tenants will not need our services but remember if you do we will do our best to keep your owners property safe and protected from any further damage. Kind regards

Lia Juriansz,

Property Manager
